EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Robert J. Schneider on September 25 and 27, 2006.

In claim 1, line 4, "connected with" has been changed to -- connected to --; line 5, "for the adjustment of" has been changed to -- by an adjustment means for adjusting --; and line 8, "driver for the" has been deleted.

3. As discussed with Mr. Schneider during the interview, the examiner indicated that the adjustment feature recited in instant claim 1 needed to be clearly defined so as to better define the instant claimed invention. Mr. Schneider suggested changing the intended function " said bearings are connected with a stationary substructure for the adjustment of ... " into a positive structural limitation -- said bearing are connected to a stationary substructure by an adjustment means for adjusting ... --. Mr. Schneider also indicated that means-plus-function in accordance with 35 U.S.C. 112 sixth-paragraph was invoked with respect to the instant claimed adjustment means for adjusting ... On the other hand, in regarding to the instant claimed first stops being interposed between the cylinder piston unit and the driver for the movable frog, as recited in the last part of claim 1, the examiner indicated that such wordings in the instant claim was not consistent with the structure as disclosed, and suggested the deletion of the expression

"driver for the" so as to clear any confusion in that regard. In response, Mr. Schneider accepted the examiner's proposed changes.
